WORK EXPERIENCE

Fullstack Web (MERN)   2020 - Present
The Pearl System

i worked as a professional fullstack developer with team pearl system, developed front end website architecture. Worked as a team to develop and maintain a highly sophisticated multi-state foreclosure processing application. i was responsible for designing and developing websites and platforms with node & nextjs. i work with design teams to ensure that user interactions on web pages are intuitive and engaging..

Fullstack   2019 - 6 Month
Winstore.pk

At winstore.pk we convert winstore.pk (shopify version) to modern js framework.
we also create the winstore mobile app with flutter from scratch, Worked alongside designing team to make sure application must be user friendly, i was also responsible for maintaining backend & firestore cloud functions, i've gained a lot of experience during this journey.

Flutter w/firebase   2018 - 2019
Ivylab Technologies

IvyLab Technologies is service based company. ivylab has empowered in Designing and Developing High-End Software Solution including Website Development, Mobile Application Development, and Custom Software Development Solutions. At Ivylab i created 3 major fullstack apps with flutter & firebase . As a Developer at service-based company i've gained a tremendous amount of experience.

Flutter Mobile App   2018 - 6 Month
Solution Soul

i've got a chance to join soulution soul as a trainee for one month. after one month trainee i joined solution soul as a flutter developer , solution soul is an service based company , i Created application for cross platform IOS and Android
Designed, developed, implemented, and maintained three mobile applications for clients
Analyzed user requirements, and translated client needs into application design
